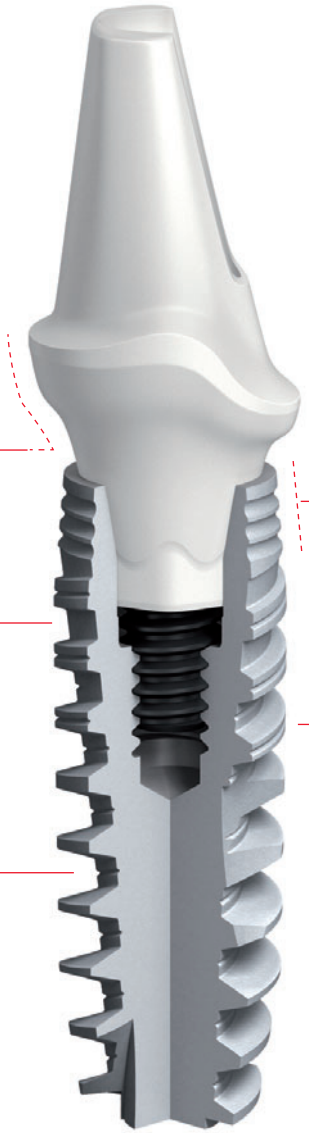
A new direction for implants.

NobelActive™ assortment update



Maximum soft tissue volume
Built-in platform shifting improves soft tissue interface for natural-looking esthetics.

Secure connection
Internal conical connection with hexagonal interlocking offers secure positioning of abutments.

High initial stability even in compromised bone situations
Expanding tapered implant body with double-lead thread design condenses bone gradually.

Maximum alveolar bone volume
Back-tapered coronal design for improved soft tissue support.

Adjustable implant orientation
Reverse-cutting flutes with drilling blades on apex enable experienced clinicians to adjust implant orientation for optimal prosthetic connection.

Dental PRODUCT SHOPPER
BEST PRODUCT 2009

Dental Product Shopper voted NobelActive Best Product 2009 only one year after its market introduction.

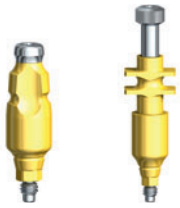
NobelActive assortment update.

4.5 mm Esthetic Abutment

For additional versatility

Esthetic Abutment CC 4.5 mm						
NP	Straight	36249		15°	36250	
RP	Straight	36251		15°	36252	



Modified impression copings

– With fewer threads for optimal seating engagement
– Larger "wings" on open tray impression copings for improved retention

Impression Coping Closed Tray CC							
NP	∅ 3.6 × 13 mm	36538	∅ 5.0 × 13 mm	36539			
RP	∅ 3.6 × 9 mm	36541	∅ 5.0 × 9 mm	36543	∅ 6.0 × 9 mm	36545
RP	∅ 3.6 × 13 mm	36540	∅ 5.0 × 13 mm	36542	∅ 6.0 × 13 mm	36544
Impression Coping Open Tray CC						
NP	∅ 3.6 × 10 mm	36258	∅ 5.0 × 10 mm	36259		
NP	∅ 3.6 × 14 mm	36260	∅ 5.0 × 14 mm	36261		
RP	∅ 3.6 × 10 mm	36263	∅ 5.0 × 10 mm	36265	∅ 6.0 × 10 mm	36267
RP	∅ 3.6 × 14 mm	36262	∅ 5.0 × 14 mm	36264	∅ 6.0 × 14 mm	36266

Modified bridge components

– Marked for simplified identification
– Impression copings with fewer threads and larger "wings" for optimal seating engagement and improved retention

Healing Abutment CC Bridge				
NP	∅ 3.5 × 5 mm	36546		
RP	∅ 3.9 × 5 mm	36547		
Impression Coping Open Tray CC Bridge				
NP		36268		
RP		36269		

New abutment retrieval tool

Simplified device for zirconia abutment retrieval

Abutment Retrieval Tool CC Zirconia			
NP	36239		
RP	36240		

Simplified implant pick-up

Titanium implant vial with enhanced "stop" for optimal implant driver engagement

CC = conical connection

Update to nomenclature

In order to ensure simplicity and harmonized product names, the entire NobelActive prosthetic assortment will be renamed to conical connection (CC) during 2011. The Esthetic Abutment NobelActive, for example, will be renamed to Esthetic Abutment Conical Connection, or simply Esthetic Abutment CC. There are no other changes to the products, except improved color coding for enhanced platform identification in some cases.
