

New graduate program

Advancing your implantology journey with Nobel Biocare

Congratulations on completing your dental school or residency program! As you embark on your professional journey, we at Nobel Biocare are committed to supporting your growth and success in implantology.

Nobel Biocare Representatives are your partners in success

Our dedicated sales representatives are here to assist you along every step of your journey in implantology.

- **Product knowledge**
Your rep is your guide through Nobel Biocare's innovative implant solutions, digital workflows, and CAD/CAM technologies.
- **Practice growth**
Learn how to manage and scale your dental practice efficiently while maintaining the highest quality of patient care.
- **Digital dentistry**
Digitize your implant workflow, simplified by powerful tools such as DTX Studio™ Clinic treatment planning software, X-Guide® navigated surgery and photogrammetry unit, DEXIS™ IS intraoral scanner, and SprintRay 3D printing ecosystem.
- **Connections**
Looking to relocate? Our team has connections with practices across the country.

We look forward to being part of your educational journey and helping you achieve excellence in implant dentistry. Visit our website or connect with our team to learn more about our exclusive new graduate offers.

Your success is our priority. Let's grow together!

Our educational offerings

Professional development is a journey, not a destination. Nobel Biocare is committed to helping you advance on your path to fulfilling your professional ambitions.

- **Fundamental courses**
Whether you're new to implant dentistry or seeking to enhance your skills, our fundamental courses cover surgical and prosthetic procedures, providing a solid foundation for predictable outcomes.
- **Advanced courses**
Ready to take on more complex procedures? Our advanced courses delve into topics like hard- and soft-tissue management, immediate function, graftless solutions, and full-arch rehabilitation.
- **Expert courses**
Designed for experienced clinicians, our expert courses focus on intricate surgical and prosthetic procedures. Topics include full-arch rehabilitation with high maxillary resorption and complex grafting.
- **Flexible learning options**
Attend in-person courses hosted across the globe or explore online resources such as on-demand webinars featuring world-class lecturers and researchers.
