Why creos xenoprotect?

creos™ xenoprotect
A natural collagen membrane
Clinical experience with creos™ xenoprotect

“In my experience, creos xenoprotect provides an elasticity that readily adapts to defects and facilitates handling.”

Dr. Oscar González-Martín, Spain

“creos xenoprotect provides a long-lasting barrier. It facilitates bone regeneration through biological modulation of defects. Together with its easy handling, these properties support its excellent clinical efficacy and applicability.”

Prof. Eric Rompen, Belgium

“What I like is that the handling is very easy. The mechanical stability is very high and when it is rehydrated it adapts very well to the underlying bone.”

Dr. Bastian Wessing, Germany

“Thanks to its elasticity and strength, creos xenoprotect is easy to handle during surgery. After surgery, it shows great biological responses and regenerative outcomes.”

Prof. Christer Dahlin, Sweden
creos xenoprotect – a resorbable collagen membrane for guided bone regeneration and guided tissue regeneration procedures.

| Outstanding handling | Low surface expansion when hydrated.¹  
|                      | Easy to trim (dry or wet) and does not stick to instruments.  
|                      | Repositioning in situ possible.  
|                      | Both sides can face the defect.  
| Mechanical strength   | Excellent suture retention.²,³  
|                      | Highly tear-resistant, making it easy to suture or fixate with pins.³,⁴  
| Low rates of complications | Uneventful wound healing.⁵  
|                       | Rates of wound dehiscence and membrane exposure are low.⁴,⁵,⁶  
| Designed to perform | Facilitates bone gain to support successful implant placement.⁴,⁶,⁷  
|                      | Enduring resistance to degradation in vivo without chemical cross linking.²  
|                      | Plays an active role in regulating bone-healing dynamics in vivo.⁸  
|                      | Good clinical results in the treatment of dehiscence defects⁶ and horizontal ridge augmentation.⁴,⁶  

Order online
Order from our complete range of implants, regenerative solutions and prefabricated prosthetics 24 hours a day through the Nobel Biocare online store.

nobelbiocare.com/store

Order by phone
For more information, and to place an order, contact your Nobel Biocare representative or customer support.
